Horizontal Lifeline Systems

G-RAFF Horizontal Lifeline Systems are permanently installed, multi-span horizontal lifelines designed to provide safe access and continuous fall protection to any operator requiring horizontal mobility.

All G-RAFF lifeline systems are engineered for operator safety, for compliance with governing O.S.H.A. standards, and for your specific application.

Features

G-RAFF Horizontal Lifeline Systems have many unique features:

- Custom designed for single or multiple access points
- Rugged cable supports
- Includes our "Insta-Rack" pedestal platform(s)
- Meets and exceeds O.S.H.A. requirements

Access

Various access options include:

- A range of man-rated trolleys can be run along overhead I-beams for continuous fall protection
- Various gangways and enclosures

Finishes

- Hot Dipped Galvanized
- Gray enamel / Safety Yellow
- Custom finishes available

Engineering

G-RAFF designs and custom-builds horizontal lifeline systems that meet even the most challenging requirements.

Our engineering team has over 150 years of experience collectively and utilizes state-of-the-art CAD software.

Contact us for more information on a custom solution for your application!
