

Portable Transloading Platform

G-RAFF's Portable Transloading Platform provides a mobile access solution for transloading operations, be it Truck to Rail, or Rail to Truck.

All G-Raff platforms are engineered for operator safety, compliance with governing O.S.H.A. standards, and for your specific application.

Features

G-RAFF Portable Transloading Platforms have many unique features:

- Custom designed to meet your application!
- May be equipped with several access options
- Various integration options with transloading systems
- Rolling base design for different site and operational requirements

Access

Platform and stairs with O.S.H.A. compliant handrail, midrail, and toe-board. Also:

- Available in Single or Double configurations
- Optional Self-leveling Safety Stairs or Safety Bridge / Gangway
- Safety enclosures are standard on gangways for operator safety while on top of trucks and railcars

Finishes

- Hot Dipped Galvanized
- Gray enamel / Safety Yellow
- Custom finishes available

Engineering

G-RAFF designs and custom-builds portable transloading systems that meet even the most challenging requirements.

Our engineering team has over 150 years of experience collectively and utilizes state-of-the-art CAD software.

Options

- Trailer package
- Loading arms
- Hose handlers
- Pump and metering systems
- Operator buildings
